

# KHALID SHAKEEL

## FrontEnd Developer

 7006602813  khalidshakeel46@gmail.com  [Portfolio Website](#)

 [LinkedIn](#) Address: Anantnag, J & K, India

## Objective

---

Frontend Developer proficient in the MERN stack (MongoDB, Express, ReactJS, Node.js) and JavaScript, with a strong focus on building intuitive user interfaces and delivering exceptional digital experiences. Experienced in integrating APIs to enhance functionality and drive user engagement.

## Education

---

**Punjab Technical University** Aug 2017 - May 2021

**B.Tech Electronics & Communication Engineering**

*Specialization: Digital Electronics, Communication Systems, and Embedded Systems*

## Work Experience

---

**Web development intern** April 2024 - May 2024

### Oasis Infobyte

- **BlogBeacon App:** Developed a responsive blogging platform using the MERN stack (MongoDB, Express, React.js, Node.js) with user authentication and CRUD functionality.
- Implemented a clean, user-friendly interface to enhance user engagement and experience.
- **Weather App:** Built a real-time weather application with React.js, integrating third-party APIs for accurate data and responsive design.
- Engineered modular, object-oriented JavaScript for reusability and maintenance.

## Projects

---

### 1. BlogBeacon

Apr 2024 - June 2024

[Live Preview](#)

[Github](#)

- Engineered a dynamic blogging platform using React.js, supported by a robust Node.js/Express backend and MongoDB for seamless data management.
- Achieved optimal performance through strategic deployment on Netlify for the frontend and Render for the backend.
- Crafted an intuitive, modern user interface leveraging single-page application (SPA) architecture to enhance user experience and navigation speed.
- Utilized Axios for efficient API integration, enabling real-time content updates and improving user engagement.

### 2. TaskHive

Feb 2024 - April 2024

[Live Preview](#)

[Github](#)

- Developed Task Hive, a task management application using React.js, Tailwind CSS, and Material Tailwind for a modern and responsive UI.
- Enhanced user experience with Framer Motion for smooth animations and interactive transitions.
- Implemented core features including: Task creation, editing, deletion, and Toggle task completion status
- Optimized performance through efficient React coding practices and asset management, ensuring fast load times and a seamless user experience.

## Skills

---

Web development | Javascript | React-JS | Redux | MongoDB | Express | Api | Tailwind | Bootstrap | Html & CSS | Responsive Web Design | Git | Github
